Curriculum

Pre- Primary

KJA stands with the intention of imparting quality education in order to transform the society by providing education to have holistic development in children. This is done by planning activity based, learner centric learning method. We try our best to cater to them new knowledge and learning experiences. We give much attention towards the development of the listening, speaking, reading and writing skills. We try to give more attention towards learning of phonetics to build up a strong base for the kids. Children are given an atmosphere of fun with learning including rhymes, games, doing and learning. Children also get opportunities to develop in the area of co- curricular activities.

Primary

The learning in primary class have been more interesting one where children are not stressed out rather they are provided with learning which are included with lots of hands on activities, exploring the surroundings, discovering talents within them. The concepts of each subjects are made easily understandable by presenting it in pictorial and concrete items. Along with studies they also get opportunities to develop their talents in the area of sports and cultural activities.

Middle School

The journey of a child from Pre- Primary to middle school is presented in an interesting way so that the learner develops a curiosity to learn and understand the concept behind everything. We provide ample opportunities to learn and develop deeper understanding. Our curriculum is designed in such a way that we keep in mind the three types of learners: Auditory Learner, Visual Learner and Kinesthetic Learner. We enable children to think logically, enquire and learn the concept, also to apply the learnt concepts in daily life. This is the time when they explore more in the area of mathematics, Science and Social Studies and also develop Languages.

We incorporate value-based education and desire to see the children growing up being responsible citizens of our nation, who will be the key instruments in the transformation and development of their own society. Along with academic skills, we also develop in them the area of sports and cultural activities. We present a curriculum which we can analyse time to time and bring improvement in the same.
